Exultsoft Phoenix 9600 Billing Terminal can be used in retail outlets, restaurants, food joints, juice stalls, parking collection, utility bill collection, card based loyalty transactions, and on line ticketing. The billing application can be customized to meet your specific requirements.

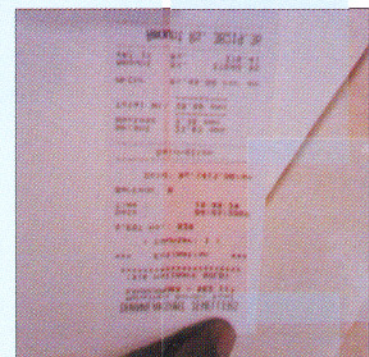

- ▶ Exultsoft Phoenix 9600 The Billing terminal comes with
- ▶ Dual Smart Card Readers
- ▶ Built in modem (optional: GPRS,GSM, LAN, WLAN, Rs485)
- ▶ Magnetic Swipe Card Reader
- ▶ Contact less card reader (Option)
- ▶ Biometric Finger Print Scanner (Option)
- ▶ RS232 port for data transfer
- ▶ Built in Thermal Printer
- ▶ Battery (Option)
- ▶ Interface for external bar code reader(Option).
- ▶ Interface for EM lock, Turnstile gate,and Boom

The billing terminal software enhances the security features of the application by using smart cards with pin number for valid authentication, builds data redundancy by storing the transactions in the smart card(in addition to terminal memory). The transactions stored in the terminal can be transferred to the Central Server/PC System through RS232-C or PSTN Modem built in the terminal. The transaction data(every transaction or end of the day) can also be transferred to the server/PC through GPRS, GSM, LAN or WLAN network.

Applications:

- ▶ Restaurant Billing
- ▶ Utility Billing (Gas Cylinder Distri & Petrol Dispensing Stations.....)
- ▶ Retail Stores (Jewelry,Coffee.....)
- ▶ Parking
- ▶ Fast Food Joints
- ▶ Juice Joints
- ▶ Loyalty card
- ▶ Cable Operators
- ▶ Canteen Management System
- ▶ Time & Attendance Management System
- ▶ Library Management System
- ▶ On line Ticketing
- ▶ Pre-Paid Card (For Compus)
- ▶ Line Sales Billing (Cool Drinks, Poultry products.....)

Our development team understand the need for customized requirements in the above application areas. We provide end to end solution by integrating the Billing Terminal to the back end system/PC.
