

Time and Attendance Management System (TAMS)

“Time is an integral part of life and is respected by all. “Time” symbolizes growth and stability. With respect to an organization also Time plays an important role in an organization in that every aspect of an organization from leads received to delivery of product is measured in terms of “Time”. Exultsoft has developed a Time and Attendance Management System that helps an organization to mark the attendance of its employees in order to identify their arrival and departure time and hence their work hours.

FEATURES

- The system has provision for defining and maintaining details about the Employees, their Department, Section, Designation, Grade, Shift details, Category, Promotion details, Holiday list and Leave details etc. of an organization.

Employee Details Form

- The personal, official and contact details of each employee can be maintained using this system.

EXULTSOFT

- Leave application, authorization by senior official and cancellation are possible using this system.
- The calculation of attendance is done by the system automatically at the end of the shift.
- The System provides manual entry of an employee's attendance in case he/she is unable to use his/her access card.

BENEFITS

- v Time and Attendance Management System is an efficient and user-friendly system to regulate the attendance of employees.
- v Reports based on late arrival and early departure of employees and the total number of hours worked can be calculated.
- v Leave application, cancellation and Authorization is made easy.
- v It provides alerts on employees who are regular latecomers and early goers.
- v Graphical representation of attendance reports of employees can be generated for quick viewing.
- v Customized MIS reports can be generated.
